Because of the rapid changes in the market conditions, you do not guarantee that an Instruction may be executed in full or the prices quoted at any specific time and I/we will be bound by such execution.

I/We further acknowledge that due to the trading practices of the Exchanges or other markets in which transactions are executed, it may not always be able to execute orders at the prices quoted "at best" or "at market" and I/we agree in any event to be bound by transactions executed by you following instructions given by me/us.

8.2 Repeating Nature

The above representations and warranties shall be deemed to be repeated immediately before each Instruction is given or executed.

8.3 Instructions from Other Persons

Even if I/we have disclosed to you that I am/we are trading on behalf of other person(s), you are not required to act on any instruction other than the Instructions. You will not be liable for refusing to act upon the instructions given by any person who purport to be my/our principal or for acting upon the Instructions notwithstanding any notice that my/our authority to act on behalf of my/our principal has been revoked, withdrawn or varied.

8.4 Other Interests

I/We acknowledge that if you give any investment recommendation to me/us, you or any of your Affiliates may have an interest, relationship or arrangement which is material in respect of the Securities, transaction, arrangement or service concerned. Any determination of whether an Event of Default has occurred shall be made by using reasonable judgment. I/We undertake to notify you immediately in writing of the occurrence of any such event which does or is likely to constitute an Event of Default (although any failure to so notify you will not prevent an Event of Default from having occurred).

9.3 All amounts become due

- (a) Upon the occurrence of any events specified in Clause 9.2, all amounts owing by me/us under these Terms and/or any Additional Terms shall become immediately payable on demand, and interest will accrue at the rate provided in Clause 5.2 on the amount outstanding from time to time.

Upon the occurrence of any events referred to in Clause 9.2 of these Terms, the further performance by you of any of your outstanding obligations to me/us under these Terms and/or any Additional Terms (whether for the payment of money or otherwise) shall be conditional upon I/we having fully discharged all my/our obligations to you under these Terms and/or any Additional Terms.

9.6 Other companies in the group

Other companies within your group may purchase the securities or other assets which are the subject of any sale made pursuant to Clause 9.1 free from any right of redemption, and the Group Company shall not be accountable to me/us for any profits, charges or commission received by any of them or their nominees or agents as a result of the exercise by you of powers conferred by Clause 9.1.

15.4 *Non-Waiver*

Failure or delay in exercising any rights, power or privilege by you in respect of the agreement contained in these Terms or any Additional Terms shall not operate as a waiver, nor shall a single or partial exercise, enforcement or waiver of any such rights, power or privilege preclude you from further exercise, enforcement, or the exercise or enforcement of any other right, power or privilege hereunder.

Any notice, payment or delivery by you to either or any one of the joint account holders shall be a full and sufficient discharge of your obligations to notify, pay or deliver under these Terms or any Additional Terms.

The death of any one joint account holder does not operate to terminate the Agreement.

In the event of any joint account holder is incapacitated or if a bankruptcy order is made against any joint account holder or if the operation of the Account is affected by any court order or notice from any competent authority against a joint account holder, the operation of the Account (including the withdrawal or transfer of funds or Securities) will be suspended until an administrator or receiver is appointed or the consent of the receiver or official receiver is obtained or the court order is discharged or the relevant notice is removed (as the case may be).

Neither you nor any Information Provider warrants or guarantees the accuracy, completeness, timeliness and correct sequencing of the Financial Information made available to me/us. I/We acknowledge that the Financial Information shall not be considered sufficient or reliable enough or be used for the purpose of formulating any investment or trading decision, policy or strategy.

5. Risk Disclosure Statement

I/We hereby acknowledge that you have explained the following Risk Disclosure Statements to me/us and I/we have read and fully understand the same:-

Risk of Securities Trading

The prices of securities fluctuate, sometimes dramatically. The price of a security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling securities.

Risk of Trading Growth Enterprise Market Stock

Growth Enterprise Market (GEM) stocks involve a high investment risk. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. GEM stocks may be very volatile and illiquid.

I/We should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Current information on GEM stocks may only be found on the internet website operated by the Stock Exchange of Hong Kong Limited. GEM companies are usually not required to issue paid announcements in gazetted newspapers.

I/We should seek independent professional advice if I am/we are uncertain of or have not understood any aspect of this risk disclosure statement or the nature and risks involved in trading of GEM stocks.

Risk of Trading Nasdaq-Amex Securities at the Stock Exchange of Hong Kong Limited

The securities under the Nasdaq-Amex Pilot Program (PP) are aimed at sophisticated investors. I/We should consult you and become familiarized with the PP before trading in the PP securities. I/We should be aware that the PP securities are not regulated as a primary or secondary listing on the Main Board or the GEM of SEHK.

Risk of Client Assets Received or Held Outside Hong Kong

Client assets received or held by you outside Hong Kong are subject to the applicable laws and regulations of the relevant overseas jurisdiction which may be different from those in Hong Kong (including the Securities and Futures Ordinance and the rules made thereunder). Consequently, such client assets may not enjoy the same protection as that conferred on client assets received or held in Hong Kong.

Risk of Online Trading

Transactions over the internet may be subject to interruption, transmission blackout, delayed transmission due to internet traffic or incorrect data transmission due to the public nature of the internet. There may also be a time lag in transmission of information, instruction and communication via the internet. This may subject instructions to non-execution, delays or error in execution or execution at prices different from those indicated on the internet.

Risk of Trading on Exchanges other than the Main Board or the GEM of SEHK

In the event that I/we wish to have transactions pursuant to this Agreement executed on Exchanges other than the SEHK, I/we acknowledge and recognize that, since such transactions will be subject to the rules and regulations of those Exchanges, and applicable local laws, and not those of the SEHK, I/we may have a markedly different level and type of protection in relation to those transactions compared to the level and type of protection afforded by the rules and regulations of the SEHK and Hong Kong law (and I/we, acknowledge and recognize, without limitation, that such transactions executed on exchanges other than the SEHK will not be subject to a right to claim under the compensation fund established under the Securities and Futures Ordinance where I/we suffer a pecuniary loss).

Specific Risk Relating to Securities Denominated in Renminbi ("RMB")

RMB securities are subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuations in the exchange rate of RMB may result in losses in the event that I/we convert RMB into Hong Kong dollars ("HKD") or other foreign currencies.

Currently, RMB is not fully and freely convertible and conversion of RMB through banks is subject to a daily limit and other limitations as applicable from time to time. I/We should take note of the limitations and changes thereof as applicable from time to time and allow sufficient time for exchange of RMB from/to another currency if the RMB amount exceeds the daily limit.

I/We should open RMB bank accounts for money settlement purpose if I/we wish to receive payments (such as sales proceeds and dividends) in RMB via banks.

Any RMB conversion in relation to a RMB securities transaction shown in statement of trading confirmation is based on the prevailing exchange rate provided by the SEHK at 11:00am or other time as stipulated by the SEHK on the relevant trade day from time to time. However, actual RMB conversion upon settlement or on other conversion day will be based on an exchange rate determined by you as a principal according to the prevailing exchange rate.

If I/we provide a settlement sum in a currency other than RMB, you will convert the settlement sum to RMB at the exchange rate determined by you as a principal according to the prevailing exchange rate.

RMB securities will be traded and settled in RMB. However, all trading related fees (including stamp duty, SFC transaction levy and the Exchange trading fees) shall be payable to Inland Revenue Department, SFC and SEHK by you, as the case may be, on behalf of me/us in HKD. Of the settlement sum in RMB, you shall convert an amount equivalent to the trading related fees into HKD to settle the trading related fees. Any gains or loss arising from the currency exchange regarding the trading related fees shall be for the account of you instead of me/us. I/We shall not have any right to claim any gain arising from such currency conversion.

Risk of providing an authority to hold mail or to direct mail to third parties

If I/we provide you with an authority to hold mail or to direct mail to third parties, it is important for me/us to promptly collect in person all contract notes and statements of my/our account and review them in detail to ensure that any anomalies or mistakes can be detected in a timely fashion.

I/We shall not have any right or claim against you in respect of any loss arising out of any such sale, realisation, redemption, liquidation or disposal or proposed sale, realisation, redemption, liquidation or disposal, however such loss may have been caused, and whether or not a better price could or might have been obtained by either deferring or advancing the date of such sale, realisation, redemption, liquidation, disposal or otherwise.

6.3 *Voting Rights*

At any time after you become entitled to exercise your rights to dispose of or sell any securities in my/our Securities Account (if any) or Margin Securities Account in accordance with these Additional Terms and without any further consent or authority on my/our part, you may exercise at your absolute discretion (in my/our name or otherwise) in respect of any of the securities in the Securities Account (if any) or the Margin Securities Account any voting rights and any powers or rights which may be exercised by the person or persons in whose name or names such securities are registered or who is the holder thereof under the terms thereof or otherwise in such manner as it deems fit.

6.4 *No Enquiries by Purchasers*

No purchaser or other person dealing with you or with your attorney or agent shall be concerned to enquire:

- (a) whether any power exercised or purported to be exercised by you have become exercisable;
- (b) whether any money remains due on this security;
- (c) as to the propriety or regularity of any of your actions; or
- (d) as to the application of any money paid to you.

6.5 *Suspense Account*

You may place the proceeds of sale or realization of any securities pursuant to these Additional Terms to the credit of a suspense account with a view to preserving your rights to prove for the whole of your claim against me/us in the event of any proceedings in or analogous to bankruptcy, liquidation, winding up, composition or arrangement.

6.6 *Client Securities Standing Authority*

I/We hereby authorize you and any of your associated entities (as defined in Part 1 of Schedule 1 to the Securities and Futures Ordinance) to:

- (a) apply any of my/our securities in the Securities Account or securities collateral in the Margin Securities Account pursuant to a securities borrowing and lending agreement;
- (b) deposit any of my/our securities collateral in the Margin Securities Account with an authorized institution as collateral for financial accommodation provided to you;
- (c) deposit any of my/our securities collateral in the Margin Securities Account with a recognized clearing house or another intermediary licensed or registered for dealing in securities as collateral for the discharge and satisfaction of your settlement obligations and liabilities.

The term of my/our consent contained in this Clause 6.6 shall be for a period of twelve months from the date on which I/we agree to be bound by these Additional Terms, and may be renewed or shall be deemed to be renewed upon its expiry date for a further period of twelve months in such manner as may be required by applicable laws, regulations and codes of conduct from time to time. I/We may withdraw my/our such consent by giving not less than seven (7) days' prior written notice to you but in such a case, you may terminate the Credit Facilities granted to me/us.

7. **Risk Disclosure Statement**

I/We hereby acknowledge that you have explained the following Risk Disclosure Statement to me/us and I/we have read and fully understand the same:-

Risk of Margin Trading

The risk of loss in financing a transaction by deposit of collateral is significant. I/We may sustain losses in excess of my/our cash and any other assets deposited as collateral with you. Market conditions may make it impossible to execute contingent orders, such as "stop-loss" or "stop limit" orders. I/We may be called upon at short notice to make additional margin deposits or interest payments. If the required margin deposits or interest payments are not made within the prescribed time, my/our collateral may be liquidated without my/our consent. Moreover, I/we will remain liable for any resulting deficit in my/our account and interest charged on my/our account. I/We should therefore carefully consider whether such a financing arrangement is suitable in light of my/our own financial position and investment objectives.

Risk of Providing an Authority to Lend or Deposit Securities with Third Parties

There is risk if I/we provide you with an authority that allows you to apply my/our securities or securities collateral pursuant to a securities borrowing and lending agreement, repledge my/our securities collateral for financial accommodation or deposit my/our securities collateral as collateral for the discharge and satisfaction of your settlement obligations and liabilities.

If my/our securities or securities collateral are received or held by you in Hong Kong, the above arrangement is allowed only if I/we consent in writing. Moreover, unless I am/we are a professional investor, my/our authority must specify the period for which it is current and be limited to not more than 12 months. If I am/we are a professional investor, these restrictions do

not apply.

Additionally, my/our authority may be deemed to be renewed (i.e. without my/our written consent) if you issue me/us a reminder at least 14 days prior to the expiry of the authority, and I/we do not object to such deemed renewal before the expiry date of my/our then existing authority.

I am/We are not required by any law to sign these authorities. But an authority may be required by you, for example, to facilitate margin lending to me/us or to allow my/our securities or securities collateral to be lent to or deposited as collateral with third parties. You should explain to me/us the purposes for which one of these authorities is to be used.

If I/we sign one of these authorities and my/our securities or securities collateral are lent to or deposited with third parties, those third parties will have a lien or charge on my/our securities or securities collateral. Although you are responsible to me/us for my/our securities or securities collateral lent or deposited under my/our authority, a default by you could result in the loss of my/our securities or securities collateral.

A cash account not involving securities borrowing and lending is available from you. If I/we do not require margin facilities or do not wish my/our securities or securities collateral to be lent or pledged, do not give the above authorities and ask to open this type of cash account.

ADDITIONAL TERMS FOR COMMODITIES TRADING

Each confirmation shall be supplemental to and form a part of the General Terms and Conditions of Business and these Additional Terms and shall be subject to the terms of General Terms and Conditions of Business and these Additional Terms. At all times, General Terms and Conditions of Business, these Additional Terms and all confirmations shall constitute the single and only agreement between me/us and you with respect to the subject matter of these Additional Terms.

4.1 Deposit of Margin

I/We hereby agree to deposit and maintain such Margin and meet immediately on demand all Margin calls and or demands for Variation Adjustments thereto and provide you with such guarantees and other security in such amount, form and within such time and on such terms as you may from time to time designate in relation to the Commodities Account. 4.2 Margin Calls

I/We shall immediately upon demand by you provide you with such additional Margin as you may determine and require from time to time. No previous Margin requirement shall limit your right to vary Margin requirements at any later time and changes in Margin requirements (increase or decrease) will apply to existing Futures/Option Contracts as well as those entered into after the date of such changes. Any failure by me/us to meet immediately on demand any Margin calls shall entitle you to close out any or all open Futures/Option Contracts. A demand shall be deemed to have been made when you despatch a letter to such effect or a confirmation of transaction, statement or other document containing such a demand to me/us or when you attempt to contact me by phone, e-mail or any other channel for such purposes, whether or not I/we can be contacted.

4.3 Transfer of Margin to Exchange

You may from time to time, without prior notice to me/us, in your absolute discretion, transfer all or any part of the Margin or any other amounts held for my/our account to any account of an exchange, clearing house or broker to enable you to pay any margin or such other sums of money by whatever name called demanded or required by such exchange, clearing house or broker in connection with Futures or Option transactions executed by you for me/us.

4.4 Interest Accrued on Margin

Any interest, dividends or other benefits accrued or to be accrued or derived or to be derived from the Margin shall not form part of the Margin.

I/We shall be liable for any consequence arising out of or in connection with my/our failure to meet immediately on demand any calls for Margin, additional Margin and/or demands for Variation Adjustments.

4.7 *Application of Monies and Property*

Without prejudice and in addition to any of your other rights and remedies hereunder, I/we hereby irrevocably authorize you, without prior notice to me/us, to apply all or any part of any monies or other property held for my/our account by you in any account of any nature whatsoever including, without limitation, the Commodities Account:

- (a) in or towards the provision of any Margin or additional Margin required by you pursuant to Clauses 4.1 and 4.2; and/or
- (b) in or towards satisfaction of any of your obligations or liabilities to any person insofar as such obligations or liabilities arise in connection with or incidental to any Futures/Option Contracts entered into by you for and on my/our behalf; and/or
- (c) in or towards payment of monies properly required to meet commissions, brokerages, levies or other proper charges and fees relating to any Futures/Options Contracts entered into by you for and on my/our behalf;

notwithstanding that any such applications may result in my/our being required by you to provide additional Margin.

5. Settlement

5.1 *Delivery of Commodity*

Subject to Clause 5.3, in respect of each open Futures/Option Contract for the Commodities Account which remains subsisting on the maturity date for settlement, you and me/us shall each have an obligation to make or take delivery (as the case may be) of the Commodity the subject matter of the Futures/Option Contract on the maturity date, provided that where, according to the rules of the relevant Exchange, Clearing House and/or market, the outstanding obligations of the buyer and seller of an open Futures/Option Contract shall be satisfied solely by cash settlement based on a difference in price or value, you or me/us (as the case may be) shall settle the open Futures/Option Contract by paying the relevant difference to the other on the maturity date of the relevant Futures/Option Contract. I/We shall take all necessary actions to enable me/us to effect due settlement of each open Futures/Option Contract on my/our behalf in accordance with the rules, regulations and requirements of the relevant exchange, clearing house and/or market.

5.2 *Closing Out of Outstanding Contracts*

Subject to the terms of the General Terms and Conditions of Business, these Additional Terms and to the rules, regulations and requirements of the relevant Exchange, Clearing House and/or market, I/we may, at any time before the last trading day of the Futures/Option Contract, request you to close out the same. Any amount payable by me/us arising out of the closing out of any Futures/Option Contract shall become immediately due and payable to you upon closing out.

5.3 *Failure to Receive Payment or Delivery*

If you shall for any reason whatsoever fail to receive payment of any part of any amount or to receive delivery of any part of any quantity of any Commodity due to be paid or delivered to me/us in respect of any Futures/Option Contract entered into by you for and on my/our behalf on the due date for payment or delivery thereof in accordance with the rules and regulations of the relevant exchange, clearing house and/or Applicable Laws and Regulations, your obligations to make payment or to deliver any Commodity to me/us in respect of such Futures/Option Contract shall thereupon and by virtue of such failure become obligations to make payment of such amount or delivery of such quantity of such commodity as is equal to such payment or such quantity as is actually received by you in respect thereof.

5.4 *Action Against Exchanges*

You may in your absolute discretion take any actions whatsoever against any Exchange, Clearing House and/or any other person in respect of any failure by such Exchange, Clearing House and/or other person to make any payment or to deliver any amount of any Commodity in respect of any Futures/Options Contract referred to in Clause 5.1, provided that if any such action is taken by you, I/we shall fully indemnify you on demand in respect of all costs and expenses incurred by you in connection with the taking of such actions.

5.5 *Price of Futures/Option Contracts*

Any statement or confirmation signed by any of your authorized signatory stating the price or value at which any Futures/Option Contract is entered into or closed out, or the exchange rate applicable in any currency conversion, or the amount owing by me/us to you at any given time, shall (unless and until the contrary is established) be binding on me/us as to the particulars stated.

5.6 *Certificate of Title*

I/We acknowledge that due to the implementation of the Central Clearing and Settlement System, you are not obliged to produce and/or deliver to me/us actual certificates or documents of title for any Commodities relating to Futures Contracts and/or Option Contracts entered into by you on my/our behalf.

5.7 *Exercise of Option*

If I/we wish to exercise an Option pursuant to any Option Contract, I/we should give an Instruction to such effect to you (subject to the rules and regulations of the relevant exchange on which the Option Contract is traded or entered into) no later than such time limit as may be specified by you from time to time before the cut-off date for the tender of exercise instructions prescribed by the writer of the Option or the relevant exchange or clearing house (whichever prescribes the earliest cut-off date). Such Instruction shall only be considered valid when accompanied:

- (a) in the case of an Option for the sale of an agreed Commodity, with the underlying Commodity or document(s) of title required for making delivery; and
- (b) in the case of an Option for the purchase of an agreed Commodity, with sufficient immediately available funds to take delivery of the Commodity.

Unless specifically instructed by me/us and subject to the terms of these Additional Terms, I/we shall be deemed to have elected not to exercise an Option pursuant to an Option Contract.

6. Closing Out

6.1 *Action to be Taken upon Events of Default*

Without prejudice to your rights under the General Terms and Conditions of Business, you shall have the right, without notice and in your absolute discretion and sole judgement, to take such action as you may consider necessary or desirable to comply with or to perform, cancel or satisfy any of your obligations to me/us or any of our or your obligations to the relevant exchange and/or clearing house, as the case may be, in respect of any outstanding Futures Contract or Option Contract (including closing out and/or performing any and all such outstanding contracts) and may for such purpose buy or sell in any manner whatsoever the Commodity underlying any outstanding contract and/or apply any Margin and/or enforce any security held by you and apply the proceeds thereof in such manner as you may, in your absolute discretion, determine if any of the events of default as set out in the General Terms and Conditions of Business shall occur and all sums expended and liabilities incurred by you thereby shall be paid or reimbursed by me/us to you on demand.

6.2 *Consequences*

On the exercise of your rights under Clause 6.1 above, all amounts owing to you hereunder shall become immediately payable and you shall not be obliged to deliver to me/us any of the underlying Commodity or any money due to me/us in respect of any Futures Contract or Option Contract until all sums due from and liabilities of me/us to you in respect of any such contract or otherwise howsoever in accordance with the terms of the General Terms and Conditions of Business or these Additional Terms are satisfied or discharged to your satisfaction.

6.3 *Losses Arising Out of Closing Out*

I/We shall be liable for all losses arising out of the closing out of my/our open positions by you as aforesaid and shall indemnify you for all claims, demands, actions proceedings, damages, losses, costs and expenses (including legal cost) suffered or incurred by you arising out of my/our failure to meet our Margin calls pursuant to these Additional Terms.

7. Provisions prescribed by the SFC Code of Conduct

Without prejudice and in addition to any other provisions of the General Terms and Conditions of Business and these Additional Terms, all transactions entered into in the HKFE shall be subject to the provisions of this Clause which are prescribed by the Code of Conduct for Persons Licensed by or Registered with the SFC and which shall constitute, and be construed as part of, these Additional Terms and in case of any inconsistency between the other provisions of the General Terms and Conditions of Business or these Additional Terms and the provisions set

out in this Clause, the provisions set out in this Clause shall prevail:-

- (b) in the event that I/we suffer pecuniary loss by reason of your default, the liability of the Investor Compensation Fund will be restricted to valid claims as provided for in the Securities and Futures Ordinance and will be subject to the monetary limits specified in the Securities and Futures Ordinance and accordingly there can be no assurance that any pecuniary loss sustained by me/us by reason of such a default will necessarily be recouped from the Investor Compensation Fund in full, in part or at all;
- (c) transactions related to exchange traded futures and options contracts shall be subject to the rules of the relevant markets and exchanges, and the Rules, Regulations and Procedures of HKFE contain provisions requiring us, upon the request of HKFE or SFC, to disclose the name, the beneficial identity and such other information concerning me/us as HKFE or SFC may require, and I/we agree to provide such information concerning myself/ourselves as you may require in order for you to comply with the Rules, Regulations and Procedures of HKFE and the Securities and Futures Ordinance, and in the event you fail to comply with the disclosure requirement under Rules 606(a) or 613(a) of the Rules of HKFE, the Chief Executive of HKFE may require the closing out of positions on my/our behalf or the imposition of a margin surcharge on my/our positions;
- (d) I/we acknowledge that I/we may have varying level and type of protection in relation to transactions on different markets and exchange;
- (e) I/we acknowledge that, subject to the provisions of the Securities and Futures Ordinance and any Applicable Law and Regulations, you may take the opposite position to my/our order in relation to any Futures Contract and/or Option Contract, whether on your own account or for the account of your associated company or other customers, provided that such trade is executed competitively on or through the facilities of the HKFE in accordance with the Rules, Regulations and Procedures of the HKFE or the facilities of any other commodity, futures or options exchange in accordance with the rules of such other exchange;
- (f) I/we acknowledge that the clearing house established and operated by HKFE may do all things necessary to transfer any open positions held by you on my/our behalf and any money and security standing to the credit of my/our Commodities Account to another exchange participant of HKFE in the event of your rights as an exchange participant of HKFE are suspended or revoked;
- (g) all monies, securities and other property received by you from me/us or from any other person (including a clearing house) for my/our account shall be held by you as trustee and segregated from your own assets. These assets so held by you shall not form part of your assets for insolvency or winding up purposes but shall be returned to me/us promptly upon the appointment of a provisional liquidator, liquidator or similar officer over all or any part of your business or assets;
- (h) all monies, approved debt securities or approved securities received by you from me/us or from any other person (including the clearing house established and operated by HKFE) for my/our account shall be held by you in the manner specified under paragraphs 7 to 12 of Schedule 4 to the Code of Conduct for Persons Licensed by or Registered with SFC and I/we authorize you to apply any monies, approved debt securities or approved securities which I/we may pay to or deposit with you in the manner specified under paragraphs 14 to 15 of Schedule 4 to the Code of Conduct for Persons Licensed by or Registered with SFC. In particular, you may apply such monies, such approved debt securities or approved securities in or towards meeting your obligations to any party insofar as such obligations arise in connection with or incidental to the business of dealing in Futures Contracts and/or Option Contracts transacted on my/our behalf;

- (k) I/we acknowledge that you are bound by the HKFE Rules which permit HKFE to take steps to limit the positions or require the closing out of contracts on my/our behalf if, in the opinion of HKFE, I am/we are accumulating positions which are or may be detrimental to any particular market or markets established and operated by HKFE or which are or may be capable of adversely affecting the fair and orderly operation of any market or markets established and operated by HKFE as the case may be;

8. Risk Disclosure Statement

I/WE ACKNOWLEDGE THAT DUE TO THE VOLATILE NATURE OF COMMODITIES MARKETS, THE PURCHASE AND WRITING OF OPTIONS OVER COMMODITIES INVOLVES A HIGH DEGREE OF RISK.

WARNING TO OPTION HOLDERS

SOME OPTIONS MAY ONLY BE EXERCISED ON ITS EXPIRY DAY (EUROPEAN-STYLE EXERCISE) AND OTHER OPTIONS MAY BE EXERCISED AT ANY TIME BEFORE EXPIRATION (AMERICAN-STYLE EXERCISE). I/WE UNDERSTAND THAT UPON EXERCISE SOME OPTIONS REQUIRE DELIVERY AND RECEIPT OF THE UNDERLYING COMMODITIES AND THAT OTHER OPTIONS REQUIRE A CASH PAYMENT.

AN OPTION IS A WASTING ASSET AND THERE IS A POSSIBILITY THAT AS AN OPTION HOLDER I/WE MAY SUFFER THE LOSS OF THE TOTAL PREMIUM PAID FOR THE OPTION. I/WE ACKNOWLEDGE THAT, AS AN OPTION HOLDER, IN ORDER TO REALISE A PROFIT IT WILL BE NECESSARY TO EITHER EXERCISE THE OPTION OR CLOSE THE LONG OPTION POSITION IN THE MARKET. UNDER SOME CIRCUMSTANCES IT MAY BE DIFFICULT TO TRADE THE OPTION DUE TO LACK OF LIQUIDITY IN THE MARKET. I/WE ACKNOWLEDGE THAT YOU HAVE NO OBLIGATION EITHER TO EXERCISE A VALUABLE OPTION IN THE ABSENCE OF MY/OUR INSTRUCTION OR TO GIVE TO ME/US PRIOR NOTICE OF THE EXPIRATION DATE OF THE OPTION.

WARNING TO OPTION WRITERS

AS A WRITER OF AN OPTION I/WE MAY BE REQUIRED TO PAY ADDITIONAL MARGIN AT ANY TIME. I/WE ACKNOWLEDGE THAT AS AN OPTION WRITER, UNLIKE AN OPTION HOLDER, I/WE MAY BE LIABLE FOR UNLIMITED LOSSES BASED ON THE RISE OR FALL OF THE PRICE OF THE UNDERLYING COMMODITIES AND MY/OURS GAINS ARE LIMITED TO THE OPTION PREMIUM.

ADDITIONALLY, WRITERS OF AMERICAN-STYLE CALL (PUT) OPTIONS MAY BE REQUIRED AT ANY TIME BEFORE EXPIRY TO DELIVER (PAY FOR) THE UNDERLYING SECURITIES TO THE FULL VALUE OF THE STRIKE PRICE MULTIPLIED BY THE NUMBER OF UNDERLYING COMMODITIES. I/WE RECOGNISE THAT THIS OBLIGATION MAY BE WHOLLY DISPROPORTIONATE TO THE VALUE OF PREMIUM RECEIVED AT THE TIME THE OPTIONS WERE WRITTEN AND MAY BE REQUIRED AT SHORT NOTICE.

8.1 Risk of trading Futures and Options

- (a) The risk of loss in trading futures contracts or options is substantial. In some circumstances, I/we may sustain losses in excess of my/our initial margin funds. Placing contingent orders, such as "stop-loss" or "stop-limit" orders, will not necessarily avoid loss. Market conditions may make it impossible to execute such orders. I/We may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, my/our position may be liquidated. I/We will remain liable for any resulting deficit in my/our account. I/We should therefore study and understand futures contracts and options before I/we trade and carefully consider whether such trading is suitable in the light of my/our own financial position and investment objectives. If I/we trade options I/we should inform myself/ourselves of exercise and expiration procedures and my/our rights and obligations upon exercise or expiry.
- (b) This brief statement does not disclose all of the risks and other significant aspects of trading in futures and options. In light of the risks, myself/ourselves should undertake such transactions only if I/we understand the nature of the contracts (and contractual relationships) into which I am/we are entering and the extent of my/our exposure to risk. Trading in futures and options is not suitable for many members of the public. I/We should carefully consider whether trading is appropriate for me/us in light of my/our experience, objectives, financial resources and other relevant circumstances.

8.2 Effect of 'Leverage' or 'Gearing' of Futures

Transactions in futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract so that transactions are "leveraged" or "geared". A relatively small market movement will have a proportionately larger impact on the funds I/we have deposited or will have to deposit: this may work against me/us as well as for me/us. I/We may sustain a total loss of initial margin funds and any additional funds deposited with the firm to maintain my/our position. If the market moves against my/our position or margin levels are increased, I/we may be called upon to pay substantial additional funds on short notice to maintain my/our position. If I/we fail to comply with a request for additional funds within the time prescribed, my/our position may be liquidated at a loss and I/we will be liable for any resulting deficit.

8.3 *Risk-reducing Orders or Strategies of Futures*

The placing of certain orders (e.g. "stop-loss" orders, or "stop-limit" orders) which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders. Strategies using combinations of positions, such as "spread" and "straddle" positions may be as risky as taking simple "long" or "short" positions.

8.4 *Variable Degree of Risk of Options*

- (a) Transactions in options carry a high degree of risk. Purchasers and sellers of options should familiarize themselves with the type of options (i.e. put or call) which they contemplate trading and the associated risks. I/We should calculate the extent to which the value of the options must increase for your position to become profitable, taking into account the premium and all transaction costs.
- (b) The purchaser of options may offset or exercise the options or allow the options to expire. The exercise of an option results either in a cash settlement or in the purchaser acquiring or delivering the underlying interest. If the option is on a futures contract, the purchaser will acquire a futures position with associated liabilities for margin. If the purchased options expire worthless, I/we will suffer a total loss of my/our investment which will consist of the option premium plus transaction costs. If I am/we are contemplating purchasing deep-out-of-the-money options, I/we should be aware that the chance of such options becoming profitable ordinarily is remote.
- (c) Selling ("writing" or "granting") an option generally entails considerably greater risk than purchasing options. Although the premium received by the seller is fixed, the seller may sustain a loss well in excess of that amount. The seller will be liable for additional margin to maintain the position if the market moves unfavorably. The seller will also be exposed to the risk of the purchaser exercising the option and the seller will be obligated to either settle the option in cash or to acquire or deliver the underlying interest. If the option is on a futures contract, the seller will acquire a position in a futures contract with associated liabilities for margin. If the option is "covered" by the seller holding a corresponding position in the underlying interest or a futures or another option, the risk may be reduced. If the option is not covered, the risk of loss can be unlimited.
- (d) Certain exchanges in some jurisdictions permit deferred payment of the option premium, exposing the purchaser to liability for margin payments not exceeding the amount of the premium. The purchaser is still subject to the risk of losing the premium and transaction cost. When the option is exercised or expires, the purchaser is responsible for any unpaid premium outstanding at that time.

9. **Additional Risks Common to Futures and Options**

9.1 *Terms and Conditions of Contracts*

I/We should ask the firm with which I/we deal about the terms and conditions of the specific futures or options which I am/we are trading and associated obligations (e.g., the circumstances under I/we may become obliged to make or take delivery of the underlying interest of a futures contract and, in respect of options, expiration dates and restrictions on the time for exercise). Under certain circumstances the specifications of outstanding contracts (including the exercise price of an option) may be modified by the exchange or clearing house to reflect changes in the underlying interest.

9.2 *Suspension or Restriction of Trading and Pricing Relationships*

- (a) Market conditions (e.g., illiquidity) and/or the operation of the rules of certain markets (e.g. the suspension of trading in any contract or contract month because of price limits or "circuit breakers") may increase the risk of loss by making it difficult or impossible to effect transactions or liquidate/offset positions. If I/we have sold options, this may increase the risk of loss.
- (b) Further, normal pricing relationships between the underlying interest and the futures, and the underlying interest and the option may not exist. This can occur when, for example, the futures contract underlying the option is subject to price limits while the option is not. The absence of an underlying reference price may make it difficult to judge "fair" value.

9.3 *Deposited Cash and Property*

I/We should familiarize myself/ourselves with the protections given to money or other property I/we deposit for domestic and foreign transactions, particularly in the event of a firm insolvency or bankruptcy. The extent to which I/we may recover my/our money or property may be governed by specific legislation or local rules. In some jurisdictions, property which had been specifically identifiable as my/our own will be pro-rated in the same manner as cash for purposes of distribution in the event of a shortfall.

9.4 *Commission and Other Charges*

Before I/we begin to trade, I/we should obtain a clear explanation of all commission, fees and other charges for which I/we will be liable. These charges will affect my/our net profit (if any) or increase my/our loss.

9.5 *Transaction in Other Jurisdictions*

Transactions on markets in other jurisdictions, including markets formally linked to a domestic market, may expose me/us to additional risk. Such markets may be subject to regulation which may offer different or diminished investor protection. Before I/we trade I/we should enquire about any rules relevant to my/our particular transactions. My/Our local regulatory authority will be unable to compel the enforcement of the rules of regulatory authorities or markets in other jurisdictions where your transactions have been effected. I/We should ask the firm with which I/we deal for details about the types of redress available in both my/our home jurisdiction and other relevant jurisdictions before you start to trade.

9.6 *Currency Risks*

The profit or loss in transactions in foreign currency-denominated contracts (whether they are traded in my/our own or another jurisdiction) will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.

9.7 *Trading Facilities*

Electronic trading facilities are supported by computer-based component systems for the order routing, execution, matching, registration or clearing of trades. As with all facilities and systems, they are vulnerable to temporary disruption or failure. My/Our ability to recover certain losses may be subject to limits on liability imposed by the system provider, the market, the clearing house and/or participant firms. Such limits may vary: I/we should ask the participant firm with which I/we deal for details in this respect.

9.8 *Electronic Trading*

Trading on an electronic trading system may differ from trading on other electronic trading systems. If I/we undertake transactions on an electronic trading system, I/we will be exposed to risks associated with the system including the failure of hardware and software. The result of any system failure may be that my/our order is either not executed according to my/our instructions or is not executed at all.

9.9 *Off-exchange Transactions*

In some jurisdictions, and only then in restricted circumstances, firms are permitted to effect off-exchange transactions. The firm with which I/we deal may be acting as my/our counterparty to the transaction. It may be difficult or impossible to liquidate an existing position, to assess the value, to determine a fair price or to assess the exposure to risk. For these reasons, these transactions may involve increased risks. Off-exchange transactions may be less regulated or subject to a separate regulatory regime. Before I/we undertake such transactions, I/we should familiarize myself/ourselves with applicable rules and attendant risks.

10. **General**

I/We represent and warrant to you that the Commodities Account maintained with you is not an omnibus account.

11. **Compliance with Laws**

Foreign Transactions shall be subject to the rules of the relevant markets or Foreign Futures Exchanges. I/ We may have varying levels and types of protection in relation to transactions on different markets and exchanges.

I/ We acknowledge that there may, on occasions, be a delay in making prices or in dealing by you due to the physical restraints on the HKFE or other Foreign Futures Exchange and the rapid changes in the prices of commodities and you may not, after using reasonable endeavours, be able to trade at the prices quoted at any specific time. I/ We agree that you shall not be liable for any loss arising by reasons of its failing, or being unable, to comply with any terms of my/ our instruction.

I/ We acknowledge that due to the trading practices of the HKFE or other Foreign Futures Exchange in which transactions are executed, it may not always be able to execute orders at the prices quoted "at best" or "at market" and I/ We agree in any event to be bound by transactions executed by you following Instructions given by me/ us.

12. Risk relating to Commodity Futures denominated In Renminbi (RMB)

RMB Commodity Futures are subject to exchange rate fluctuations that may provide both opportunities, and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that I/ we convert - RMB into Hong Kong dollars ("HKD") or other foreign currencies. RMB is not fully and freely convertible and in conversion of RMB through banks is subject to a daily limit and other limitations as applicable from time to time. I/ we should take note of the limitations and changes thereof as applicable from time to time and allow sufficient time for exchange of RMB from/to another currency if the RMB amount exceeds the daily limit. Any RMB conversion in relation to a RMB Commodity Futures transaction shown in statements and contract notes is based on the prevailing exchange rate provided by the Exchange at 11:00am or other time as stipulated by the Exchange on the relevant trade day from time to time. However, actual RMB conversion upon settlement or on any other conversion day will be based on an exchange rate determined by you as a principal according to the prevailing exchange rate.

RMB Commodity Futures will be traded and settled in RMB. If I/ we provide a settlement sum in a currency other than RMB, you will convert the settlement sum to RMB at the exchange rate determined by you as a principal according to the prevailing exchange rate. I/ we should open RMB bank accounts for money settlement purpose if I/ we wish to receive payments (such as sales proceeds and dividends) in RMB via banks.

All trading related fees (including stamp duty, SFC transaction levy and exchange trading fees) shall be payable to Inland Revenue Department, SFC and Exchange, as the case may be, by you on behalf of me/ us in HKD. Of the settlement sum in RMB, you shall convert an amount equivalent to the trading related fees into HKD to settle the trading related fees. Any gain or loss arising from the currency exchange regarding the trading related fees shall be for the account of you instead of me/ us. I/ we shall not have any rights to claim any gain arising from such currency conversion.

13. Risk relating to Trading in US Exchange-listed or Over-the-counter(OTC) Securities or Derivatives

I/ we should understand the US rules applicable to trades in security or security-like instrument in markets governed by US law before undertaking any such trading. US law could apply to trading in US markets irrespective of the law applicable in my/ our home jurisdiction.

Many (but by no means all) stocks, bonds and options are listed and traded on US stock exchanges. NASDAQ, which used to be an OTC market among dealers, has now also become a US exchange. For exchange-listed stocks, bonds and options, each exchange promulgates rules that supplement the rules of the US Securities & Exchange Commission ("SEC") for the protection of individuals and institutions trading in the securities listed on the exchange.

OTC trading among dealers can continue in exchange-listed instruments and in instruments that are not exchange-listed at all. For securities that are not listed on any exchange, trading can continue through the OTC bulletin board or through the inter-dealer "pink sheets" that carry representative (not actual) dealer quotes. These facilities are outside of NASDAQ.

Options on securities are subject to SEC rules and the rules of any securities exchange on which the options are listed. Options on futures contracts or commodities like wheat or gold are governed by rules of the US Commodity Futures Trading Commission ("CFTC"). There are also commercial options, like options on real estate that are governed neither by SEC nor CFTC rules.

Whether I/ we are intending to trade in US exchange-listed securities, OTC securities or derivatives (such as Options or Futures), I/ we should understand the particular rules that govern the market in which I/ we intending trade. An investment in any of these instruments tends to increase the risk and the nature of markets in derivatives tends to increase the risk even further.

Market makers of OTC bulletin board are unable to use electronic means to interact with other dealers to execute trades. They must manually interact with the market, i.e. use standard phone lines to communicate with other dealers to execute trades. This may cause delays in the time it takes to interact with the market place. This, if coupled with increase in trade volume, may lead to wide price fluctuation in OTC bulletin board securities as well as lengthy delays in execution time. I/ we should exercise extreme caution when placing market orders and fully understand the risks associated with trading in OTC bulletin board.

Market data such as quotes, volume and market size may or may not be as up-to-date as expected with NASDAQ or listed securities.

As there maybe far fewer market makers participating in OTC securities markets, the liquidity in that security may be significantly less than those in listed markets. As such, I/ we may receive a partial execution or the order may not be executed at all. Additionally, the price received on a market order may be significantly different from the price quoted at the time of order entry. When fewer shares of a given security are being traded, larger spreads between bid and ask prices and volatile swings in price may result. In some cases, the liquidation of a position in an OTC security may not be possible within a reasonable period of time.

Issuers of OTC securities have no duty to provide any information to investors, maintain registration with the SEC or provide regular reports to investors.

2. Other Information

2.1 *Summary of Prescribed Limits and Reporting Level applicable to client's accounts*

Certain prescribed limits and reporting level set by the Securities and Futures Commission ("SFC") under the Securities and Futures (Contracts Limits and Reportable Positions) Rules ("the Rules") made pursuant to Section 35 (1) of the Securities and Futures Ordinance will directly affect my/our Account(s) – these are summarized below. I/We understand and acknowledge that failure to comply with such limits or to report may constitute a criminal offence under the Securities and Futures Ordinance and the Rules.

2.2 *SFC Prescribed Limits*

Under these limits, each of MIB Futures (Hong Kong) Limited and me/us is prohibited from entering into, holding or controlling more than a specified number of open contracts in any one contract month, unless the excess is expressly authorised by SFC, HKFE or SEHK (as the case may be) under the Rules.

2.3 *SFC Reporting Level*

Under these requirements, each of MIB Futures (Hong Kong) Limited and me/us is prohibited from holding or controlling more than a specified number of open contracts in any on contract month or expiry month unless the position held or controlled is reported to the HKFE, SEHK and/or other recognized exchange pursuant to the Rules.

2.4 *Direct Application of the Rules to Clients*

The SFC's prescribed limits and reporting level apply to MIB Futures (Hong Kong) Limited for its own account and separately and directly to me/us. I/We using more than one participant of the HKFE continue to be subject to the SFC's prescribed limits and reporting level. I/We understand and acknowledge that I/we are therefore required to report to the HKFE a position which exceeds the prescribed net long or short contracts reporting level and the specific positions held through each participant of the HKFE. A sample of the reporting form is available from MIB Futures (Hong Kong) Limited on request.

2.5 *HKFE's Large Open Position Report Procedures*

The HKFE has also set large open position limits in a number of markets operated by the HKFE. In particular, I/We understand and acknowledge that I/we shall have direct reporting obligations to the HKFE where I/we hold or control, in aggregate, open positions equal to or more than the number of futures contracts and/or options contracts specified by HKFE from time to time, whether directly or through my/our associate, and whether through one or more participants of the HKFE, in which event I/we shall be required to file a Large Open Position Report with the HKFE. For the purposes of the HKFE Rules, large open position means the number of open Futures Contracts and/or Options Contracts in a particular futures contract month or option series in a particular market determined by the Board (as defined in the HKFE Rules) to be a Large Open Position pursuant to Rules 628 of the HKFE Rules. This is similar to the concept of "reportable position" prescribed in the Rules. A sample of the reporting form is available from MIB Futures (Hong Kong) Limited on request.

Please refer to the website of Hong Kong Exchanges and Clearing Limited (http://www.hkex.com.hk/eng/market/dv_tradinfo/lop.htm) for a schedule of the prescribed limits and reporting level for some of the corresponding Futures Contract or Options Contract under the HKFE Rules (which forms an integral part of this Additional Terms and is subject to change from time to time without prior notice). A copy of the schedule is available from MIB Futures (Hong Kong) Limited on request.

Additional Risk associated with Derivative Products / Structured Investment Products

A. Some Risks Associated with Structured Investment Products

1. **Issuer Default Risk**
Investors will be considered as unsecured creditors and will have no preferential claims to any assets held by a structured product issuer in the event that the structured investment product issuer become insolvent and defaults on the listed product issued by it. Investors should therefore pay close attention to the financial strength and credit worthiness of structured investment product issuers.
2. **Uncollateralised Product Risk**
Since uncollateralized structured investment products are not asset backed, therefore, if the structured investment product issuer defaults, investors may lose their entire investment. Investors should check with the listing document of the structured investment product to determine if the structured investment product is uncollateralized.
3. **Gearing Risk**
Structured investment product is leveraged and its values can change rapidly according to the gearing ratio relative to its underlying assets. In the worst scenario, value of structured investment product can drop to zero resulting in a total loss of initial investment.
4. **Expiry Considerations**
Structured investment product is worthless when expired. Investors should bear in mind of the expiry time horizon of the structured investment product when they formulate their trading strategy.
5. **Extraordinary Price Movements**
Price of structured investment product may be different (i.e. higher or lower) from its theoretical price due to outside factors such as market supply and demand.
6. **Foreign Exchange Risk**
Structured investment product not denominated in Hong Kong dollar is subjected to exchange rate risk. The price of structured investment product can be adversely affected by the currency rate fluctuation on the value of its underlying assets.
7. **Liquidity Risk**
Structured investment product issuer need to appoint a liquidity provider according to the requirements of Hong Kong Stock Exchange. The liquidity provider is responsible to provide two way quotes to facilitate the trading of the structured investment product. Investors may not able to trade the structured investment product if its liquidity provider is default or ceased to fulfill its role until a new liquidity provider has been assigned.

B. Some Additional Risks Involved in Trading Derivative Warrants

Derivative warrants are an instrument that gives an investor the right, but not the obligation, to “buy” or “sell” an underlying asset at a pre-set price (also known as the exercise price) within a certain time period following a valid exercise. They may be bought and sold prior to expiry in the market. For derivative warrants traded in Hong Kong, they are usually settled at expiry in cash.

In some markets, derivative warrants may be exercised at or prior to expiry by purchase or sale of the underlying asset. Derivative warrants may be issued in American or European styles. Holders of American-style derivative warrants may exercise at any time prior to expiry while holders of European-style derivative warrants may only exercise on the expiry date. Derivative warrants can be issued over a range of assets, including stocks, stock indices, currencies, commodities, or a basket of securities. They are issued by a third party, usually an investment bank, independent of the issuer of the underlying assets. Derivative warrants traded in Hong Kong normally have an initial life of six months to two years and when trading in the market each derivative warrant is likely to have a unique expiry date.

Derivative warrant trading involves high risks and is not suitable for every investor. Investor should understand and consider the following risks before trading in derivative warrants.

1. **Issuer Risk** : Derivative warrant holders are unsecured creditors of the issuer and they have no preferential claim to any assets an issuer may hold.
2. **Gearing Risk** : Although derivative warrants often cost less than the price of the underlying assets, a derivative warrant may change in value to a much greater extent than the underlying assets. Although potential return on derivative warrants may be higher than that on the underlying assets, it should be noted that in the worst case the value of derivative warrants may fall to zero and holders may lose their entire investment amount.
3. **Limited Life** : Unlike stocks, derivative warrants have an expiry date and therefore a limited life. Unless the derivative warrants are in-the-money, they become worthless at expiration.
4. **Time Decay** : So long as other factors remain unchanged, the value of derivative warrants will decrease over time. Therefore, derivative warrants should never be viewed as products that are bought and held as long term investments.
5. **Market Forces** : In addition to the basic factors that determine the theoretical price of a derivative warrant, derivative warrant prices are also affected by the demand for and supply of the derivative warrants. This is particularly the case when a derivative warrant issue is almost sold out and when there are further issues of an existing derivative warrant.
6. **Turnover** : High turnover should not be regarded as an indication that a derivative warrant’s price will go up. The price of a derivative warrant is affected by a number of factors in addition to market forces, such as the price of the underlying assets and its volatility, the time remaining to expiry, interest rates and the expected dividend on the underlying assets.

C. Some Additional Risks Involved in Trading CBBCs

Callable Bull/Bear Contracts (CBBCs) are issued either as Bull or Bear contracts with a fixed expiry date, allowing investors to take bullish or bearish positions on the underlying asset. CBBCs are issued by third parties, usually investment banks, independent of stock exchanges and of the underlying assets.

In Hong Kong, CBBCs may be issued with a lifespan of 3 months to 5 years and are settled in cash only. During a CBBC’s lifespan, it will be called by the issuer when the price of the underlying asset reaches a level (known as the “Call Price”) specified in the listing document. If the Call Price is reached before expiry, the CBBC will expire early and the trading of the CBBC will be terminated immediately.

1. **Mandatory Call** : A CBBC will be called by the issuer when the price of the underlying asset hits the Call Price. Payoff for Category N CBBC will be zero when they expire early. When Category R CBBC expire early the holder may receive a small amount of Residual Value payment, but there may be no Residual Value payment in adverse situations. Once the CBBC is called, even though the underlying asset may bounce back in the right direction, the CBBC which has been called will not be revived and investors will not be able to profit from the bounce-back.
2. **Gearing Effects**: Since a CBBC is a leveraged product, the percentage change in the price of a CBBC is greater compared with that of the underlying asset. When the underlying asset price is closer to the CBBC Call price, the risk for the CBBC being called is higher. Theoretically, the CBBC gearing ratio will be higher, reflecting the risk of being called.
3. **Limited Life**: A CBBC has a limited life, as denoted by the fixed expiry date. The life of a CBBC may be shorter if called before the fixed expiry date. The price of a CBBC fluctuates with the changes in the price of the underlying asset from time to time and may become worthless after expiry and in certain cases, even before the normal expiry if the CBBC has been called early

4. **Liquidity:** Although CBBC have liquidity providers, there is no guarantee that investors will be able to buy/sell CBBC at their target prices any time they wish.
5. **Funding Costs:** Different issuers adopt different formulas in calculating CBBC funding cost. When a CBBC is called, the CBBC holders (investors) will lose the funding cost for the full period since the funding cost is built into the CBBC price upfront at launch even though with the MCE, the actual period of funding for the CBBC turns out to be shorter.
6. **Movement with underlying asset:** The price of a CBBC tends to follow closely the price of its underlying asset, yet in some situations it may not. Prices of CBBC are affected by a number of factors, such as its own demand and supply, funding costs and time to expiry. And, the delta for a particular CBBC may not always be close to one, especially when the price of the underlying asset is close to the Call Price.
7. **Trading close to Call Price** When the underlying asset is trading close to the Call Price, the price of a CBBC may be more volatile with wider spreads and uncertain liquidity. CBBC may be called at any time and trading will terminate as a result.
8. **Overseas underlying assets** CBBC issued on overseas underlying assets may be called outside the Exchange's trading hours. Besides, Investors trading CBBC with overseas underlying assets are exposed to an exchange rate risk as the price and cash settlement amount of the CBBC are converted from a foreign currency into Hong Kong dollars.

D. Some Risks Associated with Exchange Traded Funds (ETFs)

Exchange Traded Funds (ETFs) are passively managed open-ended funds traded like stocks on the exchanges. In Hong Kong, all listed ETFs are authorized by the Securities and Futures Commission as collective investment schemes. ETFs track, replicate or correspond to the performance of the underlying benchmarks (e.g. an index, specific segment of a market, bonds or commodities) and offer investors an indirect access to a wide range of underlying market themes. By investing in an ETF, investor can replicate (although not 100%) the performance of the underlying strategy without actually owning the constituents that comprise the strategy. ETFs may or may not pay dividend to their holders depending on the dividend policy of individual ETFs.

1. Market risk

ETFs are typically designed to track the performance of certain indices, market sectors, or groups of assets such as stocks, bonds, or commodities. ETF managers may use different strategies to achieve this goal, but in general they do not have the discretion to take defensive positions in declining markets. Investors must be prepared to bear the risk of loss and volatility associated with the underlying index/assets.

2. Tracking errors

Tracking errors refer to the disparity in performance between an ETF and its underlying index/assets. Tracking errors can arise due to factors such as the impact of transaction fees and expenses incurred to the ETF, changes in composition of the underlying index/assets, and the ETF manager's replication strategy. (The common replication strategies include full replication/representative sampling and synthetic replication which are discussed in more detail below.)

3. Trading at discount or premium

An ETF may be traded at a discount or premium to its Net Asset Value (NAV). This price discrepancy is caused by supply and demand factors, and may be particularly likely to emerge during periods of high market volatility and uncertainty. This phenomenon may also be observed for ETFs tracking specific markets or sectors that are subject to direct investment restrictions.

4. Foreign exchange risk

Investors trading ETFs with underlying assets not denominated in Hong Kong dollars are also exposed to exchange rate risk. Currency rate fluctuations can adversely affect the underlying asset value, also affecting the ETF price.

5. Liquidity risk

Securities Market Makers (SMMs) are Exchange Participants that provide liquidity to facilitate trading in ETFs. Although most ETFs are supported by one or more SMMs, there is no assurance that active trading will be maintained. In the event that the SMMs default or cease to fulfill their role, investors may not be able to buy or sell the product.

6. Counterparty risk involved in ETFs with different replication strategies

(a) Full replication and representative sampling strategies

An ETF using a full replication strategy generally aims to invest in all constituent stocks/assets in the same weightings as its benchmark. ETFs adopting a representative sampling strategy will invest in some, but not all of the relevant constituent stocks/assets. For ETFs that invest directly in the underlying assets rather than through synthetic instruments issued by third parties, counterparty risk tends to be less of concern.

(b) Synthetic replication strategies

ETFs utilising a synthetic replication strategy use swaps or other derivative instruments to gain exposure to a benchmark. Currently, synthetic replication ETFs can be further categorized into two forms:

i. Swap-based ETFs

Total return swaps allow ETF managers to replicate the benchmark performance of ETFs without purchasing the underlying assets.

Swap-based ETFs are exposed to counterparty risk of the swap dealers and may suffer losses if such dealers default or fail to honor their contractual commitments.

ii. Derivative embedded ETFs

ETF managers may also use other derivative instruments to synthetically replicate the economic benefit of the relevant benchmark. The derivative instruments may be issued by one or multiple issuers.

Derivative embedded ETFs are subject to counterparty risk of the derivative instruments' issuers and may suffer losses if such issuers default or fail to honour their contractual commitments.

Even where collateral is obtained by an ETF, it is subject to the collateral provider fulfilling its obligations. There is a further risk that when the right against the collateral is exercised, the market value of the collateral could be substantially less than the amount secured resulting in significant loss to the ETF.

It is important that investors understand and critically assess the implications arising due to different ETF structures and characteristics.

E. Risk involved in trading equity linked instruments (ELIs)

Equity Linked Instruments (ELI) are structured products which are marketed to investors who want to earn a higher interest rate than the rate on an ordinary time deposit and accept the risk of repayment in the form of the underlying shares or losing some or all of their investment. When an investor purchases an ELI, he is indirectly writing an option on the underlying shares. If the market moves as the investor expected, he earns a fixed return from his investment which is derived mainly from the premium received on writing the option. If the market moves against the investor's view, he may lose some or all of his investment or receive shares worth less than the initial investment.

1. Exposure to equity market

Investors are exposed to price movements in the underlying security and the stock market, the impact of dividends and corporate actions and counterparty risks. Investors must also be

prepared to accept the risk of receiving the underlying shares or a payment less than their original investment.

2. Possibilities of losing investment

Investors may lose part or all of their investment if the price of the underlying security moves against their investment view.

3. Price adjustment

Investors should note that any dividend payment on the underlying security may affect its price and the payback of the ELI at expiry due to ex-dividend pricing. Investors should also note that issuers may make adjustments to the ELI due to corporate actions on the underlying security.

4. Interest rates

While most ELI offer a yield that is potentially higher than the interest on fixed deposits and traditional bonds, the return on investment is limited to the potential yield of the ELI.

5. Potential yield

Investors should consult their brokers on fees and charges related to the purchase and sale of ELI and payment / delivery at expiry. The potential yields disseminated by SEHK have not taken fees and charges into consideration.

F. Risk Involved in trading Stock Options

A stock option is a financial contract based on single underlying stock which is traded on an exchange and cleared through its clearing house. The two major types of option contracts are call option and put option. A call option buyer has the right (but not obligated) to buy the underlying stock at the strike price (i.e. pre-determined price) on or before the expiry day, while a call option seller (also known as the writer) has the obligation to sell the underlying stock at the strike price upon exercise on or before the expiry day.

A put option buyer has the right (but not obligated) to sell the underlying stock at the strike price on or before the expiry day, while a put option seller has the obligation to buy the underlying stock at the strike price upon exercise on or before the expiry day.

1. Variable degree of risk : Transaction in stock options carries a high degree of risk. Purchasers and sellers of stock options should familiarize themselves with the type of option (i.e. put or call) which they contemplate trading and the associated risks. Investors should calculate the extent to which the value of the stock option must increase for investors' position to become profitable, taking into account the premium and all transaction costs. The purchaser of stock option may offset or exercise the stock option or allow the stock option to expire. The exercise of a stock option results either in a cash settlement or in the purchaser acquiring or delivering the underlying interest. If the purchased stock options expire worthless, the purchaser will suffer a total loss of the purchaser's investment which will consist of the stock option premium plus transaction costs. If investors are contemplating purchasing deep-out-of-the-money stock options, investors should be aware that the chance of such stock options becoming profitable ordinarily is remote.

Selling ("writing" or "granting") a stock option generally entails considerably greater risk than purchasing a stock option. Although the premium received by the seller is fixed, the seller may sustain a loss well in excess of that amount. The seller will be liable for additional margin to maintain the position if the market moves unfavourably. The seller will also be exposed to the risk of the purchaser exercising the stock option and the seller will be obligated to either settle the stock option in cash or to acquire or deliver the underlying interest. If the stock option is "covered" by the seller holding a corresponding position in the underlying interest or another stock option, the risk may be reduced. If the stock option is not "covered" (also known as "naked"), the risk of loss can be unlimited. Certain exchanges in some jurisdictions permit deferred payment of the option premium, exposing the purchaser to liability for margin payments not exceeding the amount of the premium. The purchaser is still subject to the risk of losing the premium and transaction costs. When the option is exercised or expires, the purchaser is responsible for any unpaid premium outstanding at that time.

2. Terms and conditions of stock option contracts : Investors should ask the firm with which investors deal about the terms and conditions of the specific stock option which investors are trading and associated obligations (e.g. expiration dates and restrictions on the time for exercise). Under certain circumstances the specifications of outstanding contracts (including the exercise price of an options) may be modified by the exchange or clearing house to reflect changes in the underlying interest.
3. Suspension or restriction of trading and pricing relationships : Market conditions (e.g. illiquidity) and/or the operation of the rules of certain markets (e.g. the suspension of trading in any contract or contract month because of price limits or "circuit breakers") may increase the risk of loss by making it difficult or impossible to effect transactions or liquidate/offset positions. If investors have sold options, this may increase the risk of loss. Further, normal pricing relationships between the underlying interest and the option may not exist. This can occur when, for example, the interest underlying the option is subject to price limits while the option is not. The absence of an underlying reference price may make it difficult to judge "fair value".

G. Risk Involved in Trading Debt Securities

Debt securities include bonds and notes which represent loans to an entity (such as a government or corporation) in which the entity promises to repay the bondholders or note-holders the total amount borrowed. That repayment in most cases is made on maturity although some loans are repayable in installments. Unlike shareholders, holders of bonds and notes are not owners of an entity but its creditors. In return for the loan, the entity will usually compensate the bondholders or note-holders with interest payments during the life of the bond or note. The interest rate on bonds and notes can be a fixed or floating rate.

1. This is NOT a principal protected investment. The price of this product may fall in value rapidly and investors may suffer a total loss of their initial investment. Besides, The rate of return of this product cannot be estimated precisely
2. There are many factors that affect the market value and the rate of return of the debt securities, including but not limited to market risk, credit risk, liquidity risk, interest rate risk, exchange rate risk, index risk, intermediary risk, corporate action /extraordinary events.

In light of the risks, an investor should not engage in trading in derivatives unless the investor understands the nature of the transactions into which the investor is entering and the extent of the investor's exposure to risk. An investor should carefully consider whether trading in derivatives is appropriate for him in light of the investor's investment experience, objectives, risk appetite, financial resources and other relevant circumstances.

INFORMATION FOR CLIENTS

1. Margin Control Policy of MIB Securities (Hong Kong) Limited

(a) Credit Facility

Margin clients will be granted Credit Facilities up to the Margin Limit and the margin client has to ensure that the debit balance outstanding in the margin account will not exceed the Margin Limit. If at any time the debit balance outstanding in the Margin account exceeds the Margin Limit, the margin client has to immediately deposit cash with MIB Securities (Hong Kong) Limited so that after the addition such debit balance shall not be greater than the Margin Limit.

(b) Margin Call

Margin client has to ensure that the outstanding amount of the Credit Facilities in the margin account at all times will not be greater than the Acceptable Margin Value of all the securities in the margin account. The Acceptable Margin Value is the discounted value of the securities in the margin account which will be decided upon and fixed by MIB Securities (Hong Kong) Limited from time to time and at MIB Securities (Hong Kong) Limited's sole discretion.

If the outstanding amount of the Credit Facilities is greater than the Acceptable Margin Value, the margin client shall immediately after such condition exists, whether or not the margin client has received a notice from MIB Securities (Hong Kong) Limited, deposit such amount of cash or securities acceptable to MIB Securities (Hong Kong) Limited so that after the deposit, the aggregate Acceptable Margin Value of all the securities in the margin account shall not be less than the outstanding amount of the Credit Facilities. If the margin client fails to deposit sufficient amount of cash or securities acceptable to MIB Securities (Hong Kong) Limited, MIB Securities (Hong Kong) Limited may without demand sell the securities in the margin account to reduce the outstanding amount of the Credit facilities until the aggregate Acceptable Margin Value of all the securities in the margin account shall not be less than the outstanding amount of the Credit Facilities.

In general, the Acceptable Margin Value is set out as follows:

<u>Type of Securities</u>	<u>Acceptable margin value %</u>
Selected blue chips	70%
Other Blue chips and selected H shares	60%
Hang Seng China Enterprise	50%
Selected stocks with market Capitalization > HK\$2.5 billion	50%
Other Selected stocks	30%

The above stock grading criteria is applicable to diversified portfolio and stock grading for single stock account will be considered on a case by case basis. Clients should check with the Account Executives of the Acceptable Margin Value of a particular stock.

2. Margin Control Policy of MIB Futures (Hong Kong) Limited

- a. Stock index futures and options are traded for future delivery. They are traded on margin which is a sum of money normally related to the value of each lot put up by the client as a performance bond or a good faith deposit to guarantee his performance of contractual obligations.
- b. The Hong Kong Futures Exchange Limited ("Futures Exchange") from time to time establishes minimum initial and maintenance margin requirement level for all products traded through its facilities. No Future/Options business can be transacted for any client until and unless MIB FUTURES (HONG KONG) LIMITED ("MIBF") has received from client adequate collateral to cover that client's expected trading liabilities, minimum margins and variation adjustment.
- c. Clients with a margin account should therefore be aware that this type of account is valued on a daily basis and he may be liable for daily margin and variation adjustment payments. Such requirements are adopted because should the margin requirement on deposit fall below the initial margin requirement level, Futures Exchange rules require that the account be remargined to the initial margin requirement level. Client is required to maintain the initial margin and maintenance margin level required from Futures Exchange. MIBF may demand from his client a higher level of margin and variation adjustment as MIBF deems appropriate.
- d. All margin requirements must be settled in cash. For this purpose, a cheque received by MIBF in good faith which MIBF has no reason for suspecting that it will not be honoured on first presentation may be treated as cash.
- e. MIBF under no circumstances can extend any credit or give any rebate of any kind to the clients for the purpose of circumventing or evading margin requirement and/or demands for variation adjustment.
- f. MIBF may make a demand to the client for additional funds because of adverse price movement on an open futures position and MIBF will monitor continuously clients' ability to meet any margin call and/or demand for variation adjustment.
- g. In the event that any margin or demand for variation adjustment is not paid within the time specified at the time of such call (or if no time is specified at such call within 24 hours of such calls) MIBF shall be entitled to close out some or all of the client's open positions at the discretion of MIBF without the Client's consent. MIBF reserves the right to close out client's open position immediately when circumstances render such action.
- h. Any margin calls or demands for variation adjustment may be communicated to the client at the address, telephone, telefax or telex number given by the client as in the Client Information Statement or at such other address, telephone, telefax or telex number in Hong Kong (unless otherwise agreed by MIBF in writing) as the client shall hereafter notify MIBF in writing.
- i. Provided
 - (i) If by messenger, it shall be deemed communicated if it is left at the Client's address, whether actually received by the client or not;
 - (ii) If by mail, it shall be deemed communicated when deposited in the mail, whether actually received by the client or not;
 - (iii) If by telex or by telefax, it shall be deemed communicated within 5 minutes of transmission by a telex or telefax operator whether actually received by the client or not;
 - (iv) If by telephone, it shall be deemed communicated if a message is left with an answering machine or device or any person who answers the call.
- j. MIBF has the right to choose the mode of communication so transmitted.
- k. In the event that any client fails to meet two successive margin calls or demands for variation adjustment, MIBF shall forthwith notify the Futures Exchange of such failure, together with details of the account number and (where relevant) the number of exchange contracts in respect of which default has been made and the market in which they were transacted. If required by the Futures Exchange, MIBF shall also forthwith notify the Futures Exchange further information including the name and beneficial identity of the relevant client.
- l. In the event as stated in Clauses 2(g) and/or 2(k) above, MIBF shall have the right to :
 - (i) sell any or all securities and other property in the account of the client whether carried individually or jointly with others;
 - (ii) buy any or all securities and other property which may be short in such accounts;
 - (iii) cancel any open orders and to close any or all outstanding contracts and liquidate any of the client's account; and
 - (iv) sell or set off and apply any other property which MIBF may hold for the client.

RISKS ASSOCIATED WITH TRADING IN SECURITIES VIA SHANGHAI-HONG KONG STOCK CONNECT AND SHENZHEN-HONG KONG STOCK CONNECT

This Risk Disclosure Statement is issued by you in relation to the risk associated with trading in securities via the Shanghai-Hong Kong Stock Connect ("SSE-HK Connect") and Shenzhen-Hong Kong Stock Connect ("SZSE-HK Connect"). Please refer to "Chinese Connect-Supplemental Terms and Conditions" for more details.

I/We acknowledge that I/we understand and have assessed the risks relating to SSE-HK Connect and SZSE-HK Connect including but not limited to those set out in this Risk Disclosure Statement and I/we agree to accept those risks.

This Risk Disclosure Statement may be amended or supplemented from time to time. However, you do not represent that the information set out in this Risk Disclosure Statement is up-to-date, accurate or complete, nor undertake to update it from time to time. For further information, I/we may refer to the information published from time to time on your websites, HKSCC, SFC, China Securities Regulatory Commission (CSRC), Shanghai Stock Exchange (SSE) and Shenzhen Stock Exchange (SZSE).

Trading in securities via SSE-HK Connect and SZSE-HK Connect will be subject to some of the following key risks:

1. Not protected by Investor Compensation Fund

Investors should note that none of northbound or southbound trading under SSE-HK Connect or SZSE-HK Connect will be covered by Hong Kong's Investor Compensation Fund. Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong.

As far as southbound trading is concerned, since Mainland China securities brokers are neither licensees nor registered institutions with the SFC and they are not regulated by the SFC, the Investor Compensation Fund will not cover southbound trading via SSE-HK Connect or SZSE-HK Connect.

As for northbound trading, according to the Securities and Futures Ordinance, the Investor Compensation Fund will only cover products traded in Hong Kong's recognised securities market (The Stock Exchange of Hong Kong Limited, "SEHK") and recognised futures market (Hong Kong Futures Exchange Limited, "HKFE").

Since default matters in northbound trading via SSE-HK Connect or SZSE-HK Connect do not involve products listed or traded in SEHK or HKFE, so similar to the case of investors trading overseas securities, they will not be covered by the Investor Compensation Fund.

On the other hand, according to the Measures for the Administration of Securities Investor Protection Fund, the functions of China Securities Investor Protection Fund ("CSIPF") include "indemnifying creditors as required by China's relevant policies in case a securities company is subjected to compulsory regulatory measures including dissolution, closure, bankruptcy and administrative takeover by the CSRC and custodian operation" or "other functions approved by the State Council". As far as Hong Kong investors participating in northbound trading are concerned, since they are carrying out northbound trading through securities brokers in Hong Kong and these brokers are not Mainland China brokers, therefore they are not protected by CSIPF on the Mainland China.

2. Quotas used up

If the northbound daily quota of SSE-HK Connect/SZSE-HK Connect is used up, i.e. the daily quota balance of SSE-HK Connect/SZSE-HK Connect drops to zero or the daily quota is exceeded during a continuous auction session (or closing call auction for SZSE), no further buy orders will be accepted for the remainder of the day while sell orders will still be accepted. Buying services will be resumed on the next trading day. Buy orders already accepted will not be affected by the daily quota being used up and will remain on the order book of SSE or SZSE unless otherwise cancelled by the relevant brokers.

If the used up of northbound daily quota happens during the opening call auction session, new buy orders will be rejected. However, as order cancellation is common during opening call auction, the northbound daily quota balance may resume to a positive level before the end of the opening call auction. When that happens, SEHK will again accept northbound buy orders.

3. Trading day and trading hours

SSE-HK Connect and SZSE-HK Connect will only operate on days when both Mainland China and Hong Kong markets are open for trading and when banking services in both Mainland China and Hong Kong markets are available on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the Mainland China market but Hong Kong investors cannot carry out any securities trading. Investors should take note of the days SSE-HK Connect and SZSE-HK Connect are open for business and decide according to their own risk tolerance capability whether or not to take on the risk of price fluctuations in securities during the time when SSE-HK Connect or SZSE-HK Connect is closed.

In addition, there is difference in trading hours between Mainland China and Hong Kong markets. Trading hours for A-shares under SSE-HK Connect and SZSE-HK Connect are different from Hong Kong and investors shall beware of such difference.

4. Restrictions on selling imposed by front-end monitoring

For investors who usually keep their securities outside of their brokers, if they want to sell certain securities they hold, they must transfer those securities to the respective accounts of their brokers before the market opens on the day of selling (T day). If they fail to meet this deadline, they will not be able to sell those securities on T day.

5. The recalling of eligible stocks

When a stock is recalled from the scope of eligible stocks for trading via SSE-HK Connect or SZSE-HK Connect, the stock can only be sold but restricted from being bought. This may affect the investment portfolio or strategies of investors. Investors should therefore pay close attention to the list of eligible stocks as provided and renewed from time to time by SSE, SZSE and SEHK.

6. Mainland China market risks

(a) Market volatility risk

The Mainland China stock market is relatively volatile as it is mostly made up of retail investors who tend to be speculative and susceptible to the central government policies and news.

(b) Macro-economic risk

There is a close relationship between the Chinese economy and stock market performance. The Chinese economic growth is still above the global average, but has already shown signs of slowdown. Moreover, there is growing concern over the country's government and corporate debts.

(c) Currency risk

Hong Kong investors will expose to the risk of RMB exchange rate movements if they have to convert HKD into RMB for trading in Shanghai and Shenzhen A-shares. The conversion also incurs costs.

Movements in the RMB exchange rate will affect the profits and debts of the Mainland China listed companies. Such effects will be more significant to those export-oriented companies and companies having debts denominated in currencies other than RMB.

(d) Policy risk

Central government's economic and financial policies will affect the performance of investment market. Investors shall beware of the central government policies for stimulating the economy or supporting different industries, as well as their different financial policies in respect of the currency, interest rate, credit and stock markets.

7. Risks relating to ChiNext Board of SZSE

Generally, stocks listed on ChiNext Board of SZSE contain higher risk than those listed on Main Board.

(a) Regulatory Risks

The rules and guidance on listing, trading, disclosure and other matters of SZSE ChiNext vary much from those of the SZSE main board and SME board. For example, on the listing requirements, a shorter track record period and lower net profit, revenue and operating cash flow requirements will apply for company seeking IPO and listing on the ChiNext market. ChiNext companies may also have a lower post-IPO total share capital than main board and SME board companies. For details of the listing requirements on the ChiNext market, the SZSE main board and SME board, please visit SZSE website.

Besides, ChiNext market adopts disclosure rules that substantially vary from those of the main board and SME board. For example, ad hoc reports of ChiNext companies are only required to be published on a CSRC designated website and on the issuers' websites. If investors continue to check information through the usual disclosure channels for main board and SME boards, they may miss out some important information disclosed by ChiNext companies. Therefore, investors are advised to closely monitor announcements and risk alerts of ChiNext companies, be aware of market risks, and comply with relevant rules and regulations while trading in the ChiNext market.

(b) Delisting risks

The delisting standards of the ChiNext market are different from those of the SZSE main board and SME board. There are more situations that will lead to the delisting of ChiNext companies.

ChiNext companies have greater exposure to the risk of being delisted, and such delisting process may be speeded up.

In addition, the shares of ChiNext companies may be delisted immediately after SZSE determines its delisting. Investors will not be able to trade in delisted shares, and may lose all the invested capital in this case.

(c) Operating risks

ChiNext companies are generally in an early stage of development and have a shorter history. They are usually smaller in scale, have less stable operations, and are less resilient against market risks and industry risks. Although they may have higher growth potential and leverage more on technical innovations, their future performance particularly those without a profit track record is susceptible to great uncertainty.

(d) High Share Price Volatility

The share prices of ChiNext companies may fluctuate largely and frequently due to changing market conditions, investor speculations, inconsistent financial results, etc. ChiNext companies with low public float may be vulnerable to manipulations by major shareholders. The unstable financial result also adds the difficulty to the company valuations.

(e) Technical Risks

It is uncertain whether a ChiNext company is able to convert its technical innovations into physical products or services. When the industry is experiencing rapid technological development and replacement, its product may be obsolete and may not survive in the market.

(In case of any discrepancy between the English and the Chinese versions, the English version shall prevail.)
